

TOWER ANALYSIS SCOPE OF WORK

Structural Analysis	
Frequency	One-time activity (year 1) OR upon request
Analysis Method	Commercial tower analysis software, elastic three-dimensional model, second-order effects, ANSI/TIA-222-G, wind map to be provided by ATC, wind speed-up as applicable
Standards	ANSI/TIA-222-G, wind values provided by ATC, wind speed-up as applicable
Assumptions	Unless otherwise instructed: Steel Grade (yield): 300 MPa for legs, 250 MPa for braces, EHS for guy wires
Report	Input parameters, antenna and feedline schedule, summary of member utilizations, recommendations, tower profile, software output
List of Sites	Guyed towers
